

IN THE SPECIFICATION

Please replace paragraph [0021] with the following amended paragraph:

Other dimensions of threads 14 may similarly be selected based on various objectives of insert 10, such as those discussed above. For example, thread angle 50 may be between approximately 45 and 75 degrees. In the embodiment shown in FIGS. 1A-1C, thread angle 50 is approximately 60 degrees. As another example, pitch 52 may be between approximately 0.050 and 0.200 inches. In certain embodiments, pitch 52 is between approximately 0.080 and 0.120 inches. In the embodiment shown in FIGS. 1A-1C, pitch 52 is approximately 0.090 inches. In certain other embodiments, pitch 52 is approximately 0.100 inches. As yet another example, thread height 54 may be between approximately 0.010 and 0.060 inches. In certain embodiments, thread height 54 is between approximately 0.020 and 0.050 inches. In the embodiment shown in FIGS. 1A-1C, thread height 54 is approximately 0.032 inches. In certain other embodiments, thread height 54 is approximately 0.041 inches. As yet another example, root width 56 may be between approximately 0.020 and 0.040 inches. In the embodiment shown in FIGS. 1A-1C, root width 56 is approximately 0.030 inches. In particular embodiments, an implant 110 may have a substantially constant thread height 154 and a substantially constant pitch 152 as illustrated, for example, in FIGURE 4.

Please insert the following new paragraph after paragraph [00213]:

FIG. 4 illustrates an embodiment of a subtalar implant in accordance with a particular embodiment of the present disclosure.
